

**ONE PIECE
FREE-SPIN**

FREE-SPIN ALUMINUM POLES

A residential aluminum pole engineered to include a built-in "free-spinning" top section that will prevent your 3x5' nylon flag from tangling on the pole. The top section of the pole rotates on ball bearings so the flag will always be displayed appropriately. There is no need for any additional untangling accessories.

Poles come complete with two clear PVC flag collars to attach a traditional heading and grommet flag and also with a stainless steel snap and plastic swivel ring for vertical banner display. Poles are 1" in diameter to fit all 1" brackets.

Available in Brite Aluminum, Brushed Aluminum White Powder Coated, or Wood Grain finish.
